

Keep it short and simple

Rephrase at least five of the following sentences, aiming for brevity.

1. In the case of this particular elderly patient hypertensive population, reduction of blood pressure by 18/11 mmHg was achieved for a mean duration of follow up period of 4.4 years.
2. The superiority of 18-gauge catheters has not previously been demonstrated.
3. Until recently, no scientific methodology has been available to assess symptoms of genitourinary prolapse; without such methodology the design of clinical trials has been problematic.
4. These trials have led to the evidence-based introduction of several new drugs, some of which have been shown to impact on overall survival.
5. The purpose of this investigation was to determine which of a person's projected palm or whole hand area is a better approximation to 1% of their total body surface area.
6. These techniques have been developed to try to slow down and counteract the degenerative processes.
7. Ultimately, p53 guards not only against malignant transformation but also plays a role in developmental processes as diverse as aging, differentiation, and fertility.
8. Headache is an extraordinarily common pain symptom that virtually everyone experiences at one time or another.
9. Clinical seizures have been estimated to occur in 0.5% to 2.3% of the neonatal population.
10. As we can see from Figure 2, if the return kinetic energy is less than $3.2U_p$, there will be two electron trajectories associated with this kinetic energy.
