

## Question Tool for the Discussion

1. Where do we come from + what did we find? Short opening sentence with recap of aim, relevance and/or design of the study. Follow immediately with the major findings of the study.

2. What was an unexpected outcome? (If any; a comment on whether the result is expected or not)

3. How do our findings relate to what we already know? (Reference to previous research) -> this part can take several paragraphs.

4. How can we explain our findings? (If needed: reasons for unexpected results)

5. What are limitations / strengths? (How strong is the claim?)

6. What is our claim? (A generalisation arising from the results: contribution to research) -> In fact, the Conclusion.

7. What are implications? (Relevance; who benefits?)

8. What are our recommendations? (Suggestions for future research)
